Summary

Experienced Maritime Professional | Transitioning to IT | Seeking New Opportunities

Skilled maritime professional with over 5 years of experience as a Third and Second Officer on bulk carriers, Ro-Ro, and container ships, coupled with 2 years as a Vessel Traffic Service (VTS) Operator in the bustling port of St. Petersburg. Thriving in high-pressure environments, I possess a strong understanding of vessel operations and safety protocols.

Driven by a passion for technology, I am actively seeking opportunities to transition into the IT industry. With a basic knowledge of Python, Selenium, and Playwright, I am currently expanding my skill set and self-studying testing theory. My understanding of Software Testing Life Cycle (STLC) and Software Development Life Cycle (SDLC), coupled with proficiency in DevTools for element inspection and analysis, equips me to excel in client-server architecture and network communication.

Proficient in HTTP(S) protocol and familiar with Jira, I have a solid foundation in bug tracking and issue management. Leveraging Python (pytest), Selenium WebDriver, and Playwright, I can write automated tests, identify elements using CSS selectors and Xpath, and employ design patterns such as Page Object and Factory for efficient web application testing.

In addition, I possess basic knowledge of PostgreSQL and SQLite3 databases, allowing me to handle installations, configurations, and perform CRUD operations. Proficiency in Postman enables me to create collections and execute test scripts using JS snippets. Furthermore, my familiarity with Linux commands and Git version control ensures efficient collaboration and project management.

Combining my maritime background with emerging IT skills, I bring a unique perspective to any team and am eager to contribute and grow in a new field. Feel free to reach out to discuss potential opportunities and learn more about my experience. Let's connect and explore how we can collaborate for mutual success.

Experience

FSUE "Rosmorport"

Vessel Traffic Service Operator. Port Of Saint-Petersburg

August 2020 - November 2022 (2 years 4 months)

St Petersburg City, Russia

Monitoring and regulating traffic to ensure compliance with all local, national and international regulations.
